Re: **Warning** Laser/Ultraviolet Pens on sale near school

Dear Parent/Carer,

We have become aware that a number of pupils have purchased the item below from a shop near school.

These items are being marketed as toys, and sold to children.

The pen has three modes:

1. Laser pointer mode. These are very dangerous if shone directly into eyes.
2. Ultraviolet (UV) mode – it is dangerous for eyes to be exposed directly to this light – it is similar to looking directly at the sun.
3. LED white light - safe

Such items are dangerous, inappropriate for children and can cause serious damage to eyes. As such, they are not allowed to be brought into school. **We would strongly recommend that you do not let your child use laser/UV pens because they are dangerous.**

Yours Sincerely

Mr P Foster
